GP Industry Support represents the Fontijne Presses company on Polish Market within the range of laboratory presses.

For over 80 years, Fontijne Presses' hydraulic laboratory Platen Presses have been used in the polymer processing, rubber, and composites industry. The presses are utilized as sample preparation equipment and small production processes for: Quality Control, Research and Materials development.

Series of hydraulic presses in the range of 50 up to 1000 kN are offered. The presses can be either manually operated with cold press platens where only press force is needed, up to fully automatic versions, PC-controlled and with process monitoring with press platens heated to 450°C.

Our portfolio – Fast Rotator

We are the sole and exclusive representative of FastRotator in Poland.

FastRotator is an innovative machine that assists the welding construction. Through a revolutionary process this equipment is characterized by its simplicity and process efficiency.

It allows a smooth pieces movement rotation, quicker and controlled, reducing the use of over head cranes only for operations of easy loading and unloading.

GP Industry Support in 2012 signed an agency agreement with the Leifeld Metal Spinning AG company to represent it on an exclusive basis on the Polish Market.

Leifeld Metal Spinning is world leader in the development and manufacturing of machine tools for chipless metal forming. For more than a century, the heritage brand 'Leifeld' stands for quality and innovation made in Germany. Almost 6,000 machines produced and installed world-wide are proof for our employees' passion and commitment, working on quality, performance, and user friendliness of Leifeld machines.
